[0x803f7001 After Hardware Upgrade](#)

The screenshot shows the Windows Settings application window. The left sidebar contains the following categories: Home, Update & Security, Windows Update, Windows Defender, Backup, Troubleshoot, Recovery, Activation (highlighted), Find my device, For developers, and Windows Insider Program. The main content area is titled 'Activation' and shows the following information:

- Windows**
  - Edition: Windows 10 Pro
  - Activation: Windows is not activated
- Error Message:** We can't activate Windows on this device because you don't have a valid digital license or product key. If you think you do have a valid license or key, select Troubleshoot below. Error code: 0x803F7001. [Learn more](#)
- Activate Windows now**
  - Running a non-genuine copy of Windows can put you at greater risk for viruses and other security threats.
  - Go to the Store to buy genuine Windows or enter a product key.
  - [Go to Store](#)
  - [Change product key](#)
  - If you're having problems with activation, select Troubleshoot to try and fix the problem.
  - [Troubleshoot](#)
- Where's my product key?**
  - Depending on how you got Windows, activation will use a digital license or a product key.
  - [Get more info about activation](#)
- Have a question?**
  - [Get help](#)
- Make Windows better**
  - [Give us feedback](#)
